WCL -Wire Cleaner Lubricator

<input type="checkbox"/> Wire Sizes	Up to .050" in Diameter
<input type="checkbox"/> Wire Shapes	Round and Shaped
<input type="checkbox"/> Materials	All Metals
<input type="checkbox"/> Fluid Capacity	4 Fluid Ounces
<input type="checkbox"/> Operation	Passive Floating Film
<input type="checkbox"/> Dimensions	10" x 2" x 3"
<input type="checkbox"/> Weight	14 Ounces
<input type="checkbox"/> Inclusions	Mounting Bracket for TAK Straighteners
<input type="checkbox"/> Wire Lead -In & Out Guides	Ceramic Standard
<input type="checkbox"/> Rollers	"V" Grooved Plastic - 3 each
<input type="checkbox"/> Quick Drain Plug	Standard
<input type="checkbox"/> Lube Restrictor	Included - Yellow Ear Protection Sponge

Note: There are many wire straightening advantages when a lubricant is applied to the wire and should be employed when ever possible. Subsequent tools and machinery are protected from foreign particles while being lubricated for consistent manufacturing quality. Many manufactures cannot have any residual oils on their products due to down stream operations or other concerns and either have to use an evaporating lubricant or none at all. The TAK designed lubricator works well with evaporating lubricants due to the enclosed and covered reservoir design.
